

IN THE CLAIMS

Please amend the claims as follows:

Claims 1-6 (Canceled).

Claim 7 (Currently Amended): An electronic value transferring device connectable to an IC card that performs an electronic value operation, comprising:

a microprocessor for wired transmitting and receiving data to and from the IC card;

an interface circuit for providing an IC card interface to allow the IC card to ~~send and~~ receive an electronic value ~~to and from~~ an external server ~~another external IC card~~ by radio;

an antenna; and

the microprocessor having a memory for temporarily storing a plurality of the electronic values and transferring the stored electronic values to ~~the~~ another external IC card.

Claim 8 (Original): The electronic value transferring device as claimed in claim 7, wherein the electronic value transferring device is a mobile station of a cellular phone system.

Claim 9 (Original): The electronic value transferring device as claimed in claim 7, wherein the electronic value transferring device is a computer.

Claim 10 (Original): The electronic value transferring device as claimed in claim 7, wherein the connectable IC card is a contactless IC card.

Claim 11 (Currently Amended): An electronic value transferring device connectable to an IC card that performs an electronic value operation, comprising:

a microprocessor configured to perform wired to transmission and reception of  
~~transmit and receive~~ data to and from the IC card;

an interface circuit configured to provide an IC card interface to allow the IC card to  
~~send and receive~~ an electronic value ~~to and from~~ an external server ~~another external IC card~~  
by radio; and

an antenna,

wherein the microprocessor includes a memory configured to temporarily store a  
plurality of the electronic values and to transfer the stored electronic values to ~~the~~ another  
external IC card.

Claim 12 (Previously Presented): The electronic value transferring device as claimed  
in claim 11, wherein the electronic value transferring device is a mobile station of a cellular  
phone system.

Claim 13 (Previously Presented): The electronic value transferring device as claimed  
in claim 11, wherein the electronic value transferring device is a computer.

Claim 14 (Previously Presented): The electronic value transferring device as claimed  
in claim 11, wherein the connectable IC card is a contactless IC card.
